

## RIMONE for ELECTRIC FLEET

We are specialized in building robust EV Charging solutions for our clients - from the installation of chargers to their use by end customers. We make sure that EV charging becomes convenient, reliable & affordable for EV users. Our solution will help companies to achieve their sustainability goals and a step towards mobility.

## GOVT. EV INCENTIVES

Buying an EV might seem costlier, but is actually not. Govt. is offering various incentives which make it more affordable than ICE vehicle.

1. **Purchase Incentives**
2. **Registration fee exemption**
3. **Road tax exemption**
4. **Lower interest rate loans**

And many more...

### CHARGE AT HUB

Fleet can be charged at the hubs while loading and unloading of goods. Saving a lot of time and ensures fast delivery of goods.

### LOWER TCO

Electric Vehicles have low maintenance and operational cost, which helps to cut total cost of ownership of the vehicle.

### SUSTAINABILITY

Transportation is one of the largest source of emission. Fleet electrification can help organizations make a bold move towards sustainability.

We Have Seen the Future *& It's* **ELECTRIC !!!**

## Use RIMONE EV Charger to:

- Integrate global standards-based hardware for your fleet
- Partner for experienced and prioritized ongoing O&M support.
- Manage load and range of vehicle
- Build a data-driven fleet transition
